

Steve Alemansour

MATH 110-02 - TuTh 0700AM 0815AM (FA11-12781-02) (FA11-12781-02)
No. of responses = 34

Comments

2.1) Your instructor would like to know whether there is something you believe he/she has done especially well in his/her teaching of this course.

- Gave good examples, and taught the class the material while still preparing us for the exams. (1 Count)
- He definitely took time to ask if everyone was caught up or needed help, and wrote all of his examples on the chalk board very clearly. (1 Count)
- He is very good at explaining the material. You can tell he loves math and loves teaching. (1 Count)
- He knew the material extremely well and went over it carefully in his lectures and went over the assignments people had trouble on. (1 Count)
- He tried to answer everyone's questions right away & was always there on time and didn't miss any class. Loved the way he ran his class and how the tests weren't over 20 questions (1 Count)
- He uses a lot of examples (1 Count)
- His Passion for the subject makes the class much more fun! (1 Count)
- I absolutely loved how he taught the class. I always looked forward into learning something new during match class, simply because he made the difficult material easier than it looked. I do believe i learned math this semester. (1 Count)
- Mr. Alemansour's clear description of processes (that used to be complex and inconceivable to me) helped me learn far more efectively than ever before. He recognized I'm not a math major right from the start and then accomodated to the (in my case correct) assumption that math does not come easily. (1 Count)
- My instructor really knows his material and is good at teaching the class because he seems to really care about each student passing and truly understanding the material. (1 Count)
- Steve has made math something enjoyable and useful to people that HATE math...he deserves a raise (1 Count)
- The class is really well taught and is kept interesting and very direct. (1 Count)
- The one thing I can say mattered to me the most was clarity in speaking. I have had many math teachers and each one of this has been so difficult to understand that I cannot learn much in class. However, Professor Alemansour is extremely clear in his speaking and I really appreciate that. (1 Count)
- Very understanding and worked well with explaining himself. (1 Count)

2.2) Your instructor would also like to know what specific things you believe might be done to improve his/her teaching of this course.

- Don't be too late to class! haha (1 Count)
- Go over the tests more. (1 Count)
- Having more assignments to do to make sure the students understand the work. (1 Count)
- He could of put us into groups more and used more examples from the homework. Also the explaining od things could of been better, but great teacher overall. (1 Count)
- I feel Mr. Alemansour did an outstanding job at teaching this course. I have no improvements to suggest. (1 Count)

- I really think that we should have more example problems. (1 Count)
- I think that he has a very good teaching method, the only thing I disliked about the course was getting up so early to get to class. (1 Count)
- Just more feedback grade wise (1 Count)
- Not to assume that everyone understands it and move on, especially if most of the class did bad on a test. He should review the most common errors we made so that we are prepared for the final. (1 Count)
- Nothing. I think he does an excellent job. (1 Count)
- Responding to student emails. Giving more opportunity for class participation since we are being graded on participation, yet he calls on random people in the class for answers instead of letting students raise their hands and be called on. Coming to class on time/before class starts since he has to start up the projector and computer and log in. (1 Count)
- Some of the more difficult concepts could be elaborated on a bit more. For the most part, there isn't much the professor needs to improve on. (1 Count)
- The homework online was new to me and when it came to some problems we would have to input our answer certain ways so the computer would read it correctly, that is something that did confuse me. Besides the online homework the lectures really did prepare me for the tests and homework. (1 Count)

2.3) Other Comments:

- Best math class I have ever taken (1 Count)
- Enjoyed this class, especially for a 7 am class. Understood all the concepts taught. (1 Count)
- It's a good class and the professor is a good teacher. (: (1 Count)
- Just because a student decides to work out a problem all the way- and not take a short cut- to make sure of the correct answer, it does not mean that the student should be marked off a significant amount of points. (1 Count)
- Overall an enjoyable class for a math course. (1 Count)
- Thank you, Mr. Steve Alemansour, for a great semester of Math 110, which I can easily call the first math class that spoke to me (thanks to your thorough instruction). (1 Count)
