

Steve Alemansour

MATH 110-04 - TuTh 0830AM 0945AM (FA11-12783-04) (FA11-12783-04)
No. of responses = 34

Comments

2.1) Your instructor would like to know whether there is something you believe he/she has done especially well in his/her teaching of this course.

- You really do have a rather effective way of explaining everything. (1 Count)
- Always explains the problems with clarity. (1 Count)
- great examples we students can relate to. (1 Count)
- He always answers the questions that are asked and is very patient with all the students. (1 Count)
- He doesn't merely teach concepts because they are in the book, he is teaching lessons that apply to life and the skills that everyone needs to know to be able to function in the real-world. (1 Count)
- He was very helpful and patient at the beginning of the semester when I was waitlisted and unsure if I'd be able to get into the class. He was also effective in teaching the new topics and patient when my classmates and I couldn't get it. He wouldn't give us too much, but I still learned well. (1 Count)
- I like the fact that we are able to ask as many questions as we need. There is no limit time wise. (1 Count)
- I would just like to say that you are by far the best math teacher I have ever had. I appreciate that you have a sense of humor and try to make the lessons fun (especially because nobody in the class is a math or science major). I've always struggled in math just because I learn by memorization, which makes logic extremely difficult, and somehow, your teaching style has helped me understand things that I didn't understand in high school. Thank you so much Professor Alemansour. You are a truly gifted teacher. (1 Count)
- Math has never been my area of interest or where I truly succeed, but Professor Alemansour teaches so well that I actually learn new things. As long as you pay attention and take notes, you are well prepared for the tests. I would definitely recommend other friends to get him as a professor. (1 Count)
- Mr. Alemansour is very fair and gives clear, concise notes, choosing to teach what is most important and relevant to students and keeping a good pace for optimal learning. (1 Count)
- Mr. Alemansour's strongest teaching strategy was his use of graphs and drawings to demonstrate the current material we were learning. He helped me understand the "why" behind each mathematical concept. (1 Count)
- My instructor is very good about understanding and explaining the material in a way that makes sense to the class. he is aware that we all dislike math but he makes it very entertaining due to his vast knowledge in the subject. (1 Count)
- Professor Alemansour has made math for the non-math major actually fun and connects the concepts to real-life applications. I actually look forward to going to math every week. (1 Count)
- Professor Alemansour is an incredible teacher and educator. He provided such enthusiasm and excitement for math, at such an early time of the day, that the entire class I feel had a great time. He was successfully able to make a subject that no one in the class was majoring in, and make it enjoyable and fun. It was brilliantly organized and clearly taught. I had an amazing time in that class. (1 Count)
- Professor Alemansour seems to really know the teaching material well and informs us students on everything we need to know really well. (1 Count)
- teaching (1 Count)
- thank you for taking time to explain math concepts/problems to me. (1 Count)
- The way he does his assignments is really helpful. (1 Count)

- Very fun and kind teacher who makes concepts simple to understand. Works well with students. (1 Count)
- You always tried to relate it to our daily lives, and that makes math a lot more interesting. (1 Count)
- You used very good and relevant examples that pertained to everyday life you simplified math in the easiest way to understand. you did everything good, you were prompt, a fair grader, everything was pretty decent and i enjoyed the atmosphere (1 Count)

2.2) Your instructor would also like to know what specific things you believe might be done to improve his/her teaching of this course.

- Time in clas to help students redo testing scores (1 Count)
- Correction of the wrong answers in the exams would be SO helpful. (1 Count)
- honestly its really hard to find anything that needs to be improved. Professor Alemansour ran the class very precisely and everything happened for a reason. It was organized very well and the tests were a fine display of all information covered. (1 Count)
- I feel Mr. Alemansour was an excellent teacher and he seems to know how to relate to his students. There is not much needed improvement, however I would have appreciated a a few more recommended practice problems. (1 Count)
- Maybe a study guide or review sheet for tests? (1 Count)
- More examples of the problems we have questions on, even if you have covered them once before, figuring out the darn web assign web site, and making it accept the same type of answers you ask for on the test. (1 Count)
- Once taught one thing and move onto another, before the test maybe review the key points of each new thing learned. Never goes over it again once taught the first time. (1 Count)
- One thing that bothered me was the participation points which were unfair. I knew students who did not talk at all in the class and had full points and students who earned full points for asking silly questions trying to be a class clown, yet I would always actively pay attention and volunteered to write on the board once and had the least amount of points. I may not have participated to the full extent but just because I never had questions does not mean I was not participating. (1 Count)
- Slow down a little bit, but other than that spot on job. (1 Count)
- slow down a little bit... new material is hard to grasp when it is taught at a fast pace. (1 Count)
- take more time and dont rush with the new information (1 Count)
- The only problem I have with the class is the environment. The chalkboard is old and dusty which makes it hard to read but that is the only problem I have with this class. (1 Count)
- There was nothing that I found to be unclear about the class. Everything was cut and dry, there was nothing that could be misunderstood and it was ll properly laid out in the course syllabus. (1 Count)
- writing clear notes & going over more homework and test questions, creating a study guide so we know what we should specifically study for. (1 Count)
- You don't know your standing in the class if the pdf doesn't download. (1 Count)

2.3) Other Comments:

- Great Teacher (1 Count)
- I had a really good experience with this class! (1 Count)
- Professo Alemansour made math a great class, enough said. (1 Count)

- Professor Alemansour, I wanted to thank you for making Math a genuinely fun and interesting subject my first semester. I appreciated your many relevant examples and clarification. You are an A+ teacher keep it up!! :) (1 Count)
- THANK YOU (1 Count)
- The web assign that is used for the homework is horrible. The help that it offers to solve a problem isn't helpful at all, it helps you solve parts of the problem that are already known. Please consider using a different website. (1 Count)
